

## Supported Web Browsers

Mirapoint’s administrative and user interfaces are tested extensively with the most popular Internet browsers. The Mirapoint web interfaces contain advanced functionality and may not be compatible with all versions of Internet browsers and operating systems.

The following list includes the Internet browsers that have passed Mirapoint’s Quality Assurance tests with MOS 3.8, MOS 3.10, and MOS 4.1.

Browser	Platform
Internet Explorer 6 <sup>(5)</sup>	Windows XP
Internet Explorer 7 <sup>(2)</sup>	Windows XP Windows Vista <sup>(2)</sup>
Internet Explorer 8 <sup>(4)</sup>	Windows XP Windows Vista <sup>(2)</sup>
Netscape 7.1, 8.1 <sup>(5)</sup>	Windows XP
Firefox 2.0 <sup>(5)</sup> Firefox 3.0 Firefox 3.5 <sup>(4)</sup>	Windows XP Windows Vista <sup>(2)</sup> MacOS X
Safari 3.0, 4.0	Macintosh OS X
Safari 3.0, 4.0	Windows XP Windows Vista <sup>(2)</sup>

### Notes:

1. If you are using an Internet browser and operating system combination not listed above, your browser may behave differently than designed. However, it is unlikely to cause mailbox damage.
2. For Windows Vista and/or Internet Explorer 7 we recommend MOS 3.8.4 and up
3. Older versions of web browsers may be compatible; however they are no longer included in our testing suites.
4. MOS 3.10.6 or MOS 4.1.6 (or greater) is required.
5. Supported by MOS 3.10 and 4.1 and earlier. Mirapoint plans to drop support for IE 6, Firefox 2.0, and Netscape with MOS 4.2.
