

SAN Compatibility

The following chart identifies the SAN storage systems which have been qualified for use with the Mirapoint Message Server – SAN Edition (S6000)

Qualified SANS	Manufacturer	Series	Model
	Hitachi	Adaptable Modular Series ⁽¹⁾	In progress
	Hewlett Packard		In progress
	IBM	Total System Storage ^(1,2)	DS8000 series
			DS6000 series
			(DS4000 series failed qualification)
	NetApp	Fibre Attached Storage ⁽¹⁾	FAS 3020, 3040, 3050, 3070
			FAS 2050
			FAS 270

(1) Requires the use of fibre-channel drives only. SATA drives are not supported.

(2) Requires the use of IBM SAN Volume Controller

Fibre Channel Switches

Mirapoint suggests the use of Brocade Fibre-channel switches such as the [Brocade 5000](#). Mirapoint does not recommend [Brocade 300](#) or [200E](#) because they contain only one power supply.

NAS Compatibility

Under MOS 4.x, the Mirapoint Message Server 6000 no longer supports the use of NFS protocol for operation.
